“BELLA GAIA transported me back into orbit, to feel the beauty and power of the Earth.”

- John Grunsfeld
Astronaut/Spacewalker

BELLA GAIA is a spectacular audio-visual performance celebrating our cultural & natural heritage. Created by award winning director, composer, and violinist Kenji Williams, in partnership with NASA, it is described as a "Silk Road" experience expanded to a global, cosmic scale. Inspired by astronauts who spoke of the life changing power of seeing the Earth from space, this multimedia journey of our world combines high fidelity imagery of the Earth from space, data visualizations, and stirring live performances of music and dance from around the world, threaded by an orbiting flight path and stunning NASA imagery from the International Space Station.
